
Alpha Stem Cell Clinic for Northern and Central California

Grant Award Details

Alpha Stem Cell Clinic for Northern and Central California

Grant Type: Alpha Stem Cell Clinics Network Expansion

Grant Number: INFR4-13596

Investigator:

Name:	Mehrdad Abedi
Institution:	University of California, Davis
Type:	PI

Award Value: \$7,999,997

Status: Pre-Active

Grant Application Details

Application Title: Alpha Stem Cell Clinic for Northern and Central California

Public Abstract: The UC Davis Alpha Stem Cell Clinic has improved operations and streamlined processes for conducting stem cell and gene therapy clinical trials. The current proposal will accelerate and expand our activities with a focus on reaching the underserved populations in our expansive catchment area.

Statement of Benefit to California: The UC Davis Alpha Stem Cell Clinic (ASCC) recognizes the importance of a multi-targeted approach to bring new and innovative cell and gene therapy clinical trials, improve patient recruitment from a diverse population to these trials and decrease the cost of the ultimate product. Increasing awareness of cell and gene therapy trials in the underserved medical communities is one of the targets of our program to ensure all Californians with an unmet medical need can be served.
